## SILDIGRA 100

Erectile dysfunction is increasingly affecting not only men aged fifty and sixty but also younger. This is often the effect of unfavorable changes that occur in nature, poisoning the environment and disastrous eating habits and lack of exercise in modern men. Fortunately, Sildigra 100 can essentially solve your erection problems.

## What is Sildigra 100?

Sildigra 100 UK is a very effective drug for dysfunction. Its active ingredient is Sildenafil Citrate. It's the active ingredient accustomed to treat dysfunction in men. The optimal content of sildenafil makes Sildigra 100 mg effective in eliminating male potency problems, ensuring an accurate and powerful erection. The drug itself is meant for those men who have problems obtaining and maintaining an erection at a tier that permits sexual satisfaction for both partners. The drug itself works under conditions of arousal, which is critical for activating the active substance.

## How does Sildigra 100 work?

Sildigra 100 mg works by improving smooth muscle relaxation yet as regulating and strengthening blood flow. The active ingredients of the drug belong to the category of medication that inhibits phosphodiesterase type 5. After taking medicine, the blood vessels dilate, which allows for easier and faster flow of blood, among others, to the penis. At the same time, the drug slightly lowers the pressure so that the blood doesn't drain away as fast because it does under higher pressure conditions. The effect of this action is an erection. It should be remembered that the drug's action requires sexual stimulation, so it's worth taking care of sufficiently long and intense foreplay. Arousal may be a guarantee that the physique will respond with a proper [erection](#).

## How to use Sildigra 100?

The drug should be taken irregularly. We take one tablet only necessary, i.e. we plan intercourse. The tablet should be taken thirty minutes before the scheduled consumption. You'll be able to take it with or without food. However, it should be remembered that fatty meals and alcohol significantly reduce the effectiveness of the drug. Also, taking the medication on an empty stomach may delay its effect. The recommended dose is one tablet daily.

Don't take over this medicine without consulting your doctor. One tablet ensures a proper erection, at the same time eliminating ejaculation and too fast orgasm.

## Are there any contraindications to the employment of Sildigra 100?

This [cenforce 100](#) shouldn't be taken by men who use preparations that release gas or nitrates in various forms

Every product and drug, including Sildigra 100 UK, can have side effects. Within the case of Sildigra 100 mg, they're scarce. However, a tiny low percentage of users may experience a come-by pressure level to the cranial nerve, leading to a short-lived, sudden loss of vision. These symptoms have generally been seen in patients with cardiopathy, high force per unit area, and high cholesterol. In some cases, there may additionally be a so-called chronic erection. In any of those cases, you ought to see your doctor immediately.

In extreme cases, patients can also develop headaches and diarrhea, symptom, dizziness, heartburn, runny or watery nose, nosebleeds, redness, difficulty sleeping or sleeping, numbness or tingling within the hands, arms, feet or legs, muscle pain or back pain sensitivity to light, changes in eye color, sudden loss of hearing. If such symptoms occur, stop taking Sildigra 100 UK immediately and consult your doctor about the continued use of the drug.
